

Congress of the United States  
Committee on International Relations  
House of Representatives

review previous MFR's for ideas  
and Beline that you are in the best position to state  
our position and role in this picture.

Based on the letter from Chairman Zbaleki and  
conversations with the staff. We believe  
from L/R activities paper that the Committee would  
like you to address the  
following topics:

- Our view of a agency role and its role into  
government under effort to fight drugs  
from
- Brief summary of how we collect, analyze  
and assess influence to come. (as for Helms Portner)  
possible use Thailand as example
- explain rationale for our position  
on select NAM and why they vary  
from place to place
- Special emphasis on interest in world  
wide coverage of crop growing areas  
what we can do if State assistance  
continues  
need for slight augmentation
- outlook for our role

Congress of the United States  
Committee on International Relations  
House of Representatives

Because the Committee has been dealing with the top officials from each agency in the series of hearings. They will be looking for the same perspective when CIA appears. We believe that as a result of your contacts with State and other agencies on this subject that you are in the best position to represent the Agency. ~~And you~~ In addition the Chairman recognizes this and that is why he personally has asked that you appear.

Please add any issues that you believe are relevant and should be covered. We will ask the appropriate officials to get to work on a proposed State ment based on your approval of these (at this point).
